## **LaGrange Police Partner with Flock Safety in Neighborhood Security Pilot Program**

***LaGrange, Ga. March 20, 2018*** – LaGrange Police and Flock Safety are partnering in a neighborhood security pilot program.

Flock Safety is installing its 24-hour neighborhood wireless cameras in a LaGrange neighborhood. Flock Safety’s service enables communities to deploy wireless cameras that are able to capture the evidence police need to investigate and solve crime. Flock Safety’s cameras will work together as a network to capture vehicular traffic throughout the neighborhood.

*Flock Safety Security Camera*

Several communities from across the country are already live with Flock cameras today. A group of Georgia Tech graduates including one LaGrange native Paige Todd are leading this groundbreaking effort.

Flock Safety CEO Garrett Langley stated, “LaGrange’s pilot neighborhood will be protected all day every day by 4 cameras, giving all residents an increased sense of safety and security that everyone deserves. With Flock Safety’s technology,

our goal is to increase the number of non-violent crimes that are solved to 100 percent. On a national level, according to the FBI, only 13 percent of non-violent crimes are solved.”

With the Flock Safety system, communities now have the opportunity to capture, record and provide images as evidence for the police with the intent of solving more crime. Unlike traditional security options, Flock Safety is focused on not only preventing, but also solving crime. The new technology has been developed specifically for neighborhoods of all sizes, from the smallest cul de sac communities to the largest subdivisions with thousands of homes.

LPD Lt. Dale Strickland is excited to work with Flock Safety in this pilot program.

“This relatively inexpensive camera technology helps to solve and prevent crimes in our community,” he said.

“If the program takes footing it will add to the partnerships the police department has with community members to combat and solve crime.”

### **The Setup**

- Based on the number of homes as well as entrants and exits, Flock Safety will install wireless cameras and provide signage to deter would-be criminals.
- In the event of a crime, footage can be accessed via a web portal for the given time period, quickly providing images to the police to assist in their case.
- Flock provides camera installation, maintenance, hardware, footage hosting, and cellular connection for each community under the Flock Safety umbrella.
